Additional Information:	4 x 360° ჰორიზონტალური და ვერტიკალური ლაზერული ხაზების პროექცია შესანიშნავი ხილვადობით The both user-friendly and shock-resistant rotating laser BD8A with a rechargeable lithium-ion battery system facilitates decoration and assembly work where high accuracy is required. At the touch of a button, the device projects 2 x 360° horizontal and 2 x 360° vertical lines, thus enabling horizontal and vertical levelling work to be carried out simultaneously, which makes it particularly efficient to work with. The green laser lines of the BD8A are

significantly brighter than red lines and also have a higher range, contributing to improved visibility of the auxiliary laser lines even at longer distances.
